# CONTENTS

FOREWORD .................................................................................................................. 7  
PREFACE .................................................................................................................... 8  
DISASTER RISK MANAGEMENT KNOWLEDGE CENTRE ......................................... 10  
SHORT EXECUTIVE SUMMARY .................................................................................. 12  
CONTENTS ................................................................................................................... 16

1. Current status of disaster risk management and policy frameworks .................. 18
2. Understanding disaster risk: risk assessment methodologies and examples .......... 36

3 Understanding disaster risk: hazard related risk issues

3.1 Geophysical risk: earthquakes ................................................................. 138
3.2 Geophysical risk: volcanic activity ...................................................... 151
3.3 Geophysical risk: tsunamis ................................................................. 164
Recommendations                                                         179  
References                                                               180

3 Understanding disaster risk: hazard related risk issues

3.4 Hydrological risk: floods ..................................................................... 198
3.5 Hydrological risk: landslides ............................................................. 209
3.6 Hydrological risk: wave action, storm surges and coastal flooding ....... 219
Recommendations                                                         228  
References                                                               230
3 Understanding disaster risk: hazard related risk issues

Section III. Meteorological, climatological and biological risk 240

Introduction 244
3.7 Meteorological risk: extra-tropical cyclones, tropical cyclones and convective storms 246
3.8 Meteorological risk: extreme temperatures 257
3.9 Climatological risk: droughts 271
3.10 Climatological risk: wildfires 294
3.11 Biological risk: epidemics 306
Recommendations 316
References 318

3 Understanding disaster risk: hazard related risk issues

Section IV. Technological risk 336

Introduction 340
3.12 Technological risk: chemical releases 341
3.13 Technological risk: nuclear accidents 357
3.14 Technological risk: Natech 367
Recommendations 378
References 382

4 Communicating disaster risk 386

Introduction 390
4.1 Public perception of risk 393
4.2 Decision-making under uncertainty 404
4.3 Last mile communication 413
4.4 Good practices and innovation in risk communication 422
Recommendations 431
References 433

5 Managing disaster risk 442

Introduction 446
5.1 Prevention and mitigation: avoiding and reducing the new and existing risks 449
5.2 Preparedness and response 465
5.3 Recovery and avoiding risk creation 475
5.4 Risk transfer and financing 489
Recommendations 500
References 502

6 Future challenges of disaster risk management 516
